House Plan Sketch Aid

Get ready to sketch. If you don't know exactly what you want, don't worry. Focus on the things that you know you want and don't want. We can help you fill in the parts you aren't sure of. We will offer you options based on our years of professional experience. What we are aiming for is a blending of all of your ideas and concerns, and our experience with the building industry, codes, etc.

Think of the rooms of a house as blocks or components. There is usually a general layout that will suit your lifestyle.

The following examples show many different levels of ability and knowledge. Since there is communication one-on-one with a designer during the process of creating your house plans, any type of drawing can be used to start the ball rolling. (Also see BLOCK DESIGN EXAMPLE in the HELP ME AID)
